

Ship It!

**GUARANTEED SAVINGS
UP TO 30%**

Ship It

Damages in transit can be devastating to your bottom line.

Utilizing the right shipping methods can greatly reduce the risk of shipping damages.

Whether it's using a new packaging material or incorporating automation, there are countless ways that risks can be mitigated, costs can be cut, and efficiency increased.

We leverage our team of highly trained Packaging Specialists to maximize packaging effectiveness and minimize product loss. Through an in-depth audit, we'll make recommendations on how to ship better — and offer a custom solution to help do it.

Automation can speed up operations, minimize product loss, and improve throughput consistency. Not only do we work with industry-leading suppliers, but we also offer training and maintenance programs to keep you at peak efficiency.

Benefits

Increased Throughput

Reduced Consumption

Reduced/Reallocated Labour

Reduced Product Loss

Increased Food Safety

Build Trust with Retailers/Distributors

Case Sealing

We help clients audit and review their existing case sealing practices and equipment. The goal is to improve sealing efficiency and productivity through the identification and standardization of improved case sealing practices.

By adopting these new standards, we help businesses save up to 30% on their annual carton sealing costs.

Case Sealers

Uniform

- Simple Functionality
- Best Suited for Same-Size Boxes

Random

- Automatically-Adjusting Tape Head
- Seals Boxes of Varying Sizes

Case Erectors

Semi-Automatic

- Useful for Wide Range of Box Sizes
- Low Operator Involvement

Automatic

- Requires No Operator
- Folds, Forms, and Seals Box Bottom Automatically

Hot Melt Tape

Hot Melt Carton Sealing Tape offer a wide range of application flexibility and ensure consistent, reliable seals to variety of corrugated cartons.

Easy Processing

Superior Adhesion

Strong Tensile Strength

Acrylic Tape

Acrylic Carton Sealing Tape is suited for all-temperature performance, offering resistance to aging, weathering, UV light and yellowing.

High Clarity

Quick Adhesion

High Shear Strength

Cold Temperature Hot Melt Tape

Cold temperature hot melt tape is ideal for sealing cartons in cold and damp environments, storage facilities and unheated warehouses.

Designed for Cold Environments

Strong Bond in Cold Environments

Water-Activated Tape

Water-Activated Tape is offered in fibreglass reinforced or plain paper that generates an immediate destructive bond resulting in a tamper-evident package.

Extra Strength Seal

Aggressive & Permanent Adhesion

Stretch Wrapping

The Importance of Load Containment

Stretch wrapping is the process of using stretchable plastic film to secure pallet loads for shipping. The right stretch wrap system is critical to guaranteeing consistent and proper load control.

When it comes to stretch wrap, a small investment goes a long way to protecting your valuable load from damage in transit.

Hand Wrap Systems

- Manual Application
- Ideal for Low Volume
- Decrease Human Error

Turntable Stretch Wrappers

- Small Profile
- Quick Operation
- Minimal Operator Involvement

Rotary Arm Stretch Wrappers

- Keeps Load Stationary
- Ideal for Tall or Unstable Loads
- Fully Automated

Orbital Ring Stretch Wrappers

- Ideal for Long, Wide Loads
- Fully Automated
- Consistent Wrap Across Entire Load

Wrap It Right

The **Wrap It Right** Program works with clients to audit and review their existing stretch film practices and equipment to identify inefficiency.

With the goal of increasing productivity and reducing costs, **Wrap It Right** helps standardize stretch film practices

By incorporating new technology with established techniques, clients can exponentially save on stretch film costs.

Strapping

Strapping Machines can bundle products together, improve containment strength, and secure a load to a pallet — making them invaluable for food processing.

In order to determine what strapping solution is best for your operations, we evaluate existing strapping practices and equipment to identify potential improvements.

We perform an in-depth review to identify areas of inefficiency to create a lower cost per skid — that means you spend less and strap more.

Semi-Automatic

- Portable
- Optimal For Low Volume Operations
- Ideal for Backup And Off-Line Strapping

Automatic

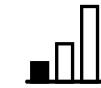

- No Operator Interaction
- Applies, Tightens, And Cuts Straps
- Drop-Off or Conveyor Compatible

Steel Strapping

Steel strapping is designed for extreme tasks that require strong containment. Ideal for heavy-duty packaging and shipping applications.

Extreme Durability

Low Elongation

Polyester Strapping

Polyester strapping is ideal for medium to heavy-duty applications, loads susceptible to shifting and to reinforce heavy packages.

High Recovery

High Break Strength

Greater Elongation

Polypropylene Strapping

Polyester strapping is designed for light to medium-duty unitizing, palletizing and bundling. Ideal for short transportation trips.

Economical

Light Duty Applications

Highest Elongation

Service

Factory Trained Dedicated Service Team

Competitive Rates and Programs

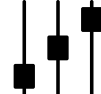

On-Site Parts for All Equipment

24-Hour Response to All Service Inquiries

Convenient Locations with Local Billing

Tailored Preventative Maintenance Programs

Performance Guarantee

At Crawford Packaging we do not just sell, install and service turn-key packaging solutions. We are committed to maximizing performance by ensuring installations operate as promised.

We find the right packaging machines, products and services to make sure your packaging solutions run quickly and efficiently.

At Crawford Packaging performance is not just our goal, it's our promise.

Buy It Right

Financing Program

Payment Plans Catering to Your Business Needs

Buy It Right offers the ability to finance equipment purchases over an extended period of time. Avoid large capital costs by consolidating equipment payments with the packaging material it uses.

1. Packaging Material

The packaging material purchases will form the basis for your machine financing plan payments.

2. Packaging Equipment

We use the value of your equipment, and amortize the cost by distributing it across your forecasted usage.

3. Finance Plan

As you order additional packaging material the financed cost of your new packaging machine is reduced.

No Capital Approvals
